

Hi everybody!

It's a pleasure for me to be here. Yesterday, it was a great night and you are the best engineers in the whole word ;-)

My name is Manuel Ballesteros. I am R&D Engineer in RF Explorer and IEEE Coordinator of YP Spanish Section.

Sorry for my low English. It's the second time when I have to present something. I am introducing what Young Professional is doing. Please I would ask for a strong applause for the organization team Valencia and Skander Mansouri to introduce me.

In YP we have a New Logo, a beautiful Logo.

Also a new team from different places of Spain.

- He is Juan Emilio Zurita, telecommunication engineer.
- He is Jesus Rodriguez, electronic engineer.
- He is Moncho, telecommunication engineer.
- He is Rubén Sandoval, telecommunication engineer. And finally, it's me

New Activities:

- IberRadio is a faire of Telecommunication and was awesome
- YP'Tour – Innovative Project with Round Table and Active Networking

This is the panel Speaker for the first edition in Seville. Engineers with different Skills and degrees.

First part, active networking. People loves party.

This is typical "cañas y tapas". That is food and beer.

Enjoy your WESYP Congress.

Finally, My Data contact. Thank you very much for your attention.
